CANADA'S CHOICE FOR
QUALITY AND SERVICE

CHECKWEIGHER INSTALLATION – PETROCHEMICAL PLANT, CALGARY, ALBERTA

Consistently accurate production weights

- This Rice Lake Motoweigh installation was set to check product weights at 5 kilograms minimum with zero tolerance for below target weights
- Measurements can be adjusted in 5 gram increments, with 2 under target and 2 over target values set to trigger warnings or ejection output
- The Motoweigh's precise control of the filling machine will allow filling to tighter tolerances
- Data reporting is a standard feature of this machine
